PIANALI IN LEGNO FENOLICO, 12MM

Il materiale con il quale sono prodotti i pianali è legno di Betulla spessore 12 mm, di colore grigio, rivestito con film fenolico ideale per essere utilizzato dove è richiesta un'alta resistenza all'usura. La superficie ha una speciale impronta antiscivolo, è resistente all'acqua, agli agenti atmosferici e alle sostanze chimiche. Inoltre il prodotto è ecofriendly, igienico e semplice da pulire.

E' studiato per poter essere fornito in kit di montaggio a qualsiasi tipo di utenza e non richiedono attrezzature particolari.

Vengono forniti di serie con

- profili in alluminio per battute portiere posteriori e laterali
- ganci fermacarico e bicchieri copriforo.

RIVESTIMENTI IN POLIPROPILENE

PANNELLATURE IN PPL ALVEOLARE

Il rivestimento interno è indicato per evitare danni di carrozzeria causati dall'urto delle merci ed è facilmente installabile.

Il materiale utilizzato è il PPL (Polipropilene) alveolare di colore grigio e spessore 4 mm. I pannelli sono impermeabili, antigraffio e antimuffa. Facili da pulire e resistenti alle alte temperature, ad acqua e olio.
